Job ID: 1889172

Organization Name: AmeReGen BioPharmaceuticals INC (SPC), KY

Organization Description: The HQ Division of the International AmeReGen Consortium manages a portfolio of high-growth companies in stem cells, nanotechnology, wellness, as well as film and media production. We practice for-profit-business-funded venture philanthropy.

AmeReGen is a Segregated Portfolio Corporation with a venture philanthropy investment portfolio of cutting edge technology-based high-growth companies each with its own management team, business model, and ring-fenced assets and liabilities from each other.

This job posting is about joining the HQ top managing team for the portfolio company AmeReGen-ImmunoCure SP (www.immunocure.com) as it re-locates to San Francisco's Stem Cell Cluster in Mission Bay in 2011. ImmunoCure is a legendary and notorious global warrior for cancer patient rights and access to adult (ethical) stem cells for cancer since 2000. Ever since the start of the Bush era's baffling US departure from free and rational science and progress US Americans have been deprived of access to proven and practical solutions for cancer that work in great dignity and are medical blockbuster successes where they were approved - in the EU more than 1/2 decade ago. Our such novel stem cell therapeutics treat cancer effectively - and without side effects.

In 2011 the HQ team will now dare to bring those adult stem cell derived cancer treatments (An invention from Stanford "married" to German robotic manufacturing precision) to the US in a David-vs-Goliath battle against a \$180billion/year US pharmaceutical industry, yet with the support of UCSF stem cell and oncology divisions, patient advocates, and Hollywood's film makers (we have a feature-length reality suspense movie about US patients who so far have to fly to Europe to save their lives with our CITA therapeutics in post-production in Hollywood, and plan a show with A-list celebrities including an "iron chef" cooking segment for cancer patient) - in other words we will make waves (See www.WhiteKnightNow.com - the COURAGE project.)

The International AmeReGen Consortium includes the first company on the globe to achieve merit-based approval for stem cell treatments - as early as 2004 (!) and is recognized as the global market leader and game-changing company that distributes robotic mass-produced and highly effective adult stem-cell-derived CITA therapeutics - globally - to treat cancer of any stage and grade without side effects.

Lead Product Info & Magnitude of AmeReGen's CITA Breakthrough:
CITA therapeutics can naturally REJECT multi-drug resistant cancer from the inside and in as short a time from treatment as 4 hours. No side effects with CITA. The hair does not fall out, no vomiting, no wasting of muscles or radiation burns... The innovative technology thus rejects cancer naturally with a process called "cancer immune surveillance", rather than the futile, expensive, and cruel "current US gold standard" of poisoning of the entire body with chemo-radiation therapy that has not changed overall survival in cancer in the last 40 years (!).

Sustainable Competitive Advantage:
The technology IP is exclusive to AmeReGen and in-licensed from Stanford University and others top stem cell and robotic manufacturing sources such as Red Cliff Holding (www.stemvest.com) IP.

The International AmeReGen Consortium has been chartered to make such next generation cancer treatments available worldwide, based on hard-evidence (CT scans, 5-20x survival) better, more cost efficient, and side-effect-free/gentler high-performance stem cell therapeutics. Our company culture is based on ethical and socially responsible global business, and our alpha in stem cells and general management - we hire only the very best talent and have many top managers with amazing professional track records amongst our individual executives.

We particularly would like to encourage the application of a women executive leader with excellent team and professional skills, yet both genders are welcome to apply and will be considered equally well. While we understand that the candidate's professional track record may be shorter that of a 20-year biopharmaceutical executive, it should have a proven track record of excellence, an entrepreneurial spirit, and, last not least a track record of actual heart-connected outreach and social change management involving US cancer patients.

If you are living in or traveling to San Francisco this winter break: Please note that we will start our first job interviews for this job posting as early as December 27th 2010 along our annual meetings and may make an early decision if the right candidate presents & qualifies.

Job Title: VP Of Global Cancer Stem Cell Programs & Wellness Outreach

Job Description:	<p>We are seeking for our 2011 new San Francisco office and portfolio company AmeReGen-ImmunoCure SP a highly qualified 2011 HBS MBA graduate for the position of VP Of Global Cancer Stem Cell Programs & Wellness Outreach.</p> <p>This is an executive position that will grow from an initial media marketing/strategic management and PR focus, and has the full potential of becoming a C-level function in one of our portfolio companies in short/medium term.</p> <p>You will be the architect of a social change management and high-impact public awareness campaign, as well as designing and implementing cancer patient wellness programs that take full advantage of the side-effect-free powerful cancer treatments that we have. Your strong financial background and strong West Coast network of philanthropic organizations will build the basis for private for-profit/non-profit/public partnering opportunities that you will architect with the CEO. You will report directly to the CEO and be special executive assistant to the Chairman in international negotiations to implement such programs worldwide. In a nutshell, the company can afford to provide the highest quality products on the globe for cancer at 90% of the cost, and in a fraction of the time to the leading cancer hospitals, WHILE being extremely profitable. We then re-invest a significant proportion of these biopharmaceutical earnings back to fund all the wellness programs we always wanted to give back the dignity and a life-style worth living to as many cancer patients as possible.</p> <p>AmeReGen plans to treat all children free of charge - one for each 10 adult cancer patients.</p> <p>We are dedicated to fight cancer with new technology, and a new social awareness and business model, as we find the current ethical and business practices of the "big pharmaceutical industry" worth improving - and see heart connectedness to patients and working via a dissemination of the truth of our breakthrough treatments in action as a strong competitive advantage. Well, and we are the best in multi-drug-resistant cancer, world-wide.</p>
Qualifications:	<p>The ideal candidate for this position technically/scholastically</p> <ul style="list-style-type: none"> • has excellent communication skills within the teams, • is able to handle ambitious projects timely and professionally, and reports effortless to CEO and team • is in the top 10% of the graduating MBA class of HBS • has done cancer outreach - and an active track record of creating wellness and relief for cancer patients through innovative product company experience, yoga/meditation, integrative health, nutritional products, self-help programs for patients etc. • is knowledgeable in the social media, PR, and in the philanthropy field, social entrepreneur passionate about technology, contribution, and healthy living • knowledge of US and/or EU health insurance (and its limitations) a plus • Computer skills including in-depth financial skills, presentation skills, social and digital media and skills, as well as conventional marketing core skills are assumed • Good and proven track record of being a public speaker, US/internationally • Experience in consumer-internet companies, direct marketing, viral marketing a plus. <p>Personally (as a Mensch; executive team fit)</p> <ul style="list-style-type: none"> • needs to be highly passionate about philanthropy and dignity, and medical progress via (ethical) adult stem cells, defend the freedom of science and a free market society. • understands the Silicon Valley/BioBay business culture; San Francisco location a plus. • is creative, out-of-the-box thinker, funny, and enthusiastic about making social change happen - whatever it takes within good ethics- and would consider trying new forms of outreach to our clients, such as creating, casting, and participating in a TV cooking show for cancer patient audiences (together with A-level celebrities... and your CEO!) • Multi-lingual and multicultural applicants are encouraged to apply • Please note that you will join a very senior executive team and we see us as your mentors and team leaders. So excellent and balanced interpersonal skills are a must. We love people of all nations, all genders and all orientations. So do you if you want to thrive here. Join a very collegial executive team of one of the most progressive stem cell companies against cancer on the planet. • You may be selected to travel with C-level executives to various countries to help launch stem cells for cancer and the wellness programs that you create, globally - AmeReGen strategically invests in GC Arabia to create more high-quality women jobs in health care there (www.StemCellsAtWork.com), while treating people with cancer needs, worldwide. • The ideal candidate has a great sense of humor, is fun to work with, proactive, and energetic, and participates actively in the in-house academy and at conferences. • We support the saving of whales and dolphins from commercial hunting (AmeReGen Ecclaisia Media & Film supported "The Cove" movie post-launch all the way to "The Oscars"; the actors are our executives' friends and heroes) and we protect oceanic life: Our products can save the oceans up to 20 million doses of highly toxic and coral destroying chemotherapy that is poured into the US watersheds each year! We believe in suspense movies as social change media :)
